

Los Angeles County Probation COVID-19 Weekly Update July 10, 2020

Juvenile Division

Testing of Youth for COVID-19

L.A. County Probation and Juvenile Court Health Services (JCHS) continues to closely monitor the health of youth in Probation juvenile facilities. Two youth in Probation facilities have tested positive for COVID-19 in the past week; one youth at Central Juvenile Hall (tested positive upon admission) and one youth at Barry J. Nidorf Juvenile Hall (youth was not a new admit and has been in care pending court proceedings).

From July 4-July 10, 58 youth were tested for COVID-19. Out of the 1,023 tests administered in juvenile facilities since the pandemic began, 30 youth have tested positive for COVID-19. Of the 30 youth who have tested positive for COVID-19 (two in the past week), 20 tested positive upon intake and 10 were existing youth. This expanded testing is part of a robust testing regimen throughout Probation juvenile facilities by the Los Angeles County Probation Department and Juvenile Court Health Services (JCHS). Besides testing youth displaying possible COVID-19 symptoms, all youth who are entering and departing juvenile hall are tested for COVID-19.

Youth who have tested positive will be housed in a designated isolation unit. The positive testing youth will be kept separate and apart from other youth until cleared by medical staff to return to a traditional housing assignment. There are three positive-testing youth currently isolated from the general population. Additionally, all youth in juvenile facilities are provided with masks.

Reducing the Population in Juvenile Facilities

Over the last week, the Los Angeles County juvenile hall population rose from 283 to 288 and the juvenile residential camp population remained at 197 over the same period. Since March 2, the juvenile hall population has decreased by 263 youth, or 47.7% and the juvenile camp population has decreased by 92 youth, or 31.8%.

The L.A. County Probation Department continues to work with the courts and legal partners on methods to safely reduce the juvenile population housed at Probation facilities. A new warrant protocol has been developed after other jurisdictions around the State were surveyed to find other tools instead of automatic detention for warrants. This exploration process led to a reimagining of the Warrant detention protocol. The protocol was developed, vetted with the courts and stakeholders, and was implemented June 23. Warrants led to approximately 30% of detentions before this change. The expectation is this new protocol will lead to reduced police/youth contact and a significant reduction in detention numbers.

Staff Health and Screening Measures

The Department is screening every person entering a juvenile detention facility. Those attempting to enter a juvenile hall or camp at any time are required to verbally respond if they currently have new or worsening symptoms of a respiratory illness. If the individual's response is that they are experiencing symptoms, they will be restricted from entering the facility that day. The department is also conducting infrared temperature checks on all individuals entering juvenile facilities.

Fourteen Probation employees have tested positive for COVID-19 over the last week. Since the pandemic began, 87 Probation staff (84 Probation employees and three

contract employees) have tested positive for COVID-19. 42 of those staff members work in Juvenile facilities.

These employees are legally entitled to privacy and we will provide no further details at this time. For each employee who has tested positive, the County will notify potential workplace contacts, including other employees who may have been in close contact with the COVID-19 positive individual.

All Probation staff have been instructed to wear face coverings in line with County and State Health Orders as part of an employee outreach campaign.

Banners have been placed on the Department's intranet site about the importance of wearing masks and a [video was produced](#) showing Departmental leadership wearing masks.

On June 26, Chief Ray Leyva sent a message to all staff reminding them of the importance of following COVID-19 precautions to protect themselves and those around them. Additionally, AFSCME Local 685 also sent out a newsletter encouraging its members to follow public safety guidelines and the labor-management protocols for COVID-19.

The Department held a staff town hall July 2 with almost 1000 staff viewing the event. During the town hall, various COVID related issues were discussed by Departmental

leadership and a Probation produced video for staff about the importance of wearing face coverings was debuted.

Currently there are 36 youth under quarantine due to possible exposure to an individual testing positive.

Health Care Services

Juvenile Court Health Services (JCHS) continues to work with Probation facility staff regarding the care of the youth in the Quarantine and Isolation units to prevent potential spread of disease. JCHS nurses have trained selected Probation staff at the juvenile halls and camps for the use of infrared thermometers on all staff and visitors upon entry to the facility. A DHS Infectious Disease specialist is assigned to assist correctional facilities. He will be a clinical resource for medical staff to help workflow and answer clinical questions.

The Department has continued to partner with JCHS to develop telemedicine services for assessment and consultation by medical staff and to build 24/7 capacity that currently does not exist. Telemedicine workstations are now operational in all juvenile halls and camps.

Staffing of Juvenile Facilities

The Department ensures that all critical security and safety posts are staffed as required by the Board and State Community Standards and in accordance with the Department's Emergency Operations Plan. Contingency plans have been developed and put in place if facilities are not adequately staffed. Juvenile and Adult Field Operations have been designated to assist and have continued to report to the halls and camps since March 23, 2020.

Expanded Precautions at Probation Offices and Facilities

In addition to efforts outlined in past updates, Probation has made additional efforts to keep youth and staff safe from COVID-19:

- The Department has issued masks to all staff and youth in juvenile halls and residential camps.
 - Alcohol wipes were distributed to all facilities to ensure handheld radios are cleaned frequently.
 - The Probation Department has continued to make safety assessments of the Downey Headquarters facility and area field offices to ensure that physical distancing plans are arranged. The plans include having hand sanitizer dispensers, and place markings to create 6 feet spacing to allow for physical distancing.
 - Probation's Management Services Bureau continue to provide janitorial services at facilities to ensure all bathrooms and staff quarters (where applicable) are cleaned daily and have readily available hand soap, paper towels, toilet paper and
-

disinfectant. The Department has also hired additional staff to clean and disinfect common touch areas twice per shift.

All Probation facilities have been instructed to conduct additional deep-cleaning efforts in high-traffic, high-volume areas, including visiting and health care facilities. Staff have also been granted permission to carry personal-use hand sanitizer. Public Health guidelines are reinforced daily to all staff and youth of the importance of social distancing and frequent handwashing.

Youth-Parent Communications

In-person visitation at juvenile halls and residential treatment facilities remains suspended. Virtual visiting is taking place in both the halls and the camps. The Probation Department is currently planning social distancing protocols for the re-opening of in person visiting sessions when public health safety permits with the support from the Los Angeles County Department of Public Health and JCHS.

Surveys were conducted in the juvenile halls to obtain feedback on remote learning and virtual visitations. 77% of the youth surveyed gave positive responses to the overall experience of virtual visits they received. The youth in camps were also given surveys and 61% reported positive experiences.

Youth are still able to make free phone calls to families and are also provided with supplies for letter writing such as paper, pencils, crayons etc. The Department pays for all postage regardless of the number of letters a youth sends out.

Other Youth Activities

- Juvenile halls are offering live streamed religious services. All camps have virtual religious services every weekend as well.
 - The Probation Department, in partnership with the Office of Los Angeles County Supervisor Mark Ridley-Thomas, the Children's Defense Fund, and the Los Angeles County Office of Education will be participating in the Freedom Schools' summer literacy program. The Probation Department has been an active partner in this program since the summer of 2013. This year marks our eighth consecutive Freedom Schools summer program. Youth at Camp Afflerbaugh, Camp Paige and Camp Rocky will be participating in Freedom Schools this year. The summer program will look a little different from years past. Social Distancing requirements and training limitations make full implementation of the program challenging this year. Youth at participating camps will work on the Integrated Reading Curriculum (IRC) portion of the Freedom Schools program starting July 13. The IRC is designed to provide students with literacy enrichment activities with a focus on social action and engagement.
 - Ceremonies for graduating youth to celebrate their accomplishments continue at Probation camps and halls.
-

Efforts to Address the Medically Fragile Population in Detention Facilities

The Probation Department continues to not have any youth with compromised immune systems or other medical conditions placing them at higher risk for COVID-19 infection. As previously reported, if any youth have other underlying medical conditions which might exacerbate the impact of such infection if one were to occur, the Department will work with Juvenile Court Health Services (JCHS) to assess and address those issues on a case by case basis.

Mental Health Services

The Department of Mental Health (DMH) implemented virtual counseling kiosks in Juvenile facilities to supplement the existing in person services provided to youth.

School for Youth in Juvenile Facilities

Los Angeles County Office of Education (LACOE) efforts to provide a quality education to youth in Probation facilities during the pandemic can be found at <https://www.lacoe.edu/LACOE-Schools/Covid-19-Distance-Learning-Plan>.

Virtual Court Hearings

Video Court for the halls continue to operate effectively. A youth that needs to attend court but is in a quarantined unit will not be transported to court.

Adult Division

Field Probation COVID-19 Precautions and related activities

Area offices remain closed to the public. Deputy Probation Officers continue to maintain contact with probation clients by phone, email and videoconference. Clients are encouraged to reach out to their assigned probation officer as well. The Department continues to conduct field visits and is prioritizing cases where there are vulnerable victims, sex offenders, and any other circumstances that are considered high risk or require special attention. In addition to conducting safety checks, officers are providing COVID-19 Public Health information and resources. Additionally, the Department released a notice instructing adult field DPOs to work with clients experiencing financial difficulty as it relates to fines and fees. Adult clients continue to receive housing support through contracts with the Health Right 360 housing services.

CDCR Accelerated Release Project

The AB 109 Bureau has been in coordination with the Chief Probation Officers of California (CPOC) and the California Department of Corrections and Rehabilitation (CDCR) on an accelerated release project, wherein approximately 1,000 inmates are being released up to 180-days early from the state prison system to County Probation for supervision.

The AB 109 Admin team is tracking all the names projected to be released early, including those being released from San Quentin. Information from those being released is being gathered from each of the prisons, including any COVID-19 information, such as negative and positive test results, quarantine and isolation periods. The AB 109 Pre-Release Center (PRC) is coordinating housing with CDCR and Project Hope. Project Hope is a State of California Housing Program for those that are being released either COVID-19 positive, or under quarantine status, who do not have housing upon release from prison. We are also working closely with our Department of Health Services (DHS) partners in coordinating medical care and housing for those who may be ineligible for Project Hope. We have been working closely with CDCR transport teams and our own MAT unit to facilitate many transports from the institutions to coordinated and agreed upon locations in Los Angeles County. Lastly, we are also keeping the Department of Mental Health (DMH) staff informed of any individuals needing mental health assessments or care, so they may be offered such services at the earliest opportunity in the community.

Deputy Probation Officers assigned to the Adult Division also continue to support the staffing in juvenile institutions.

Communication and Guidance to Public

The L.A. County Probation Department, in conjunction with DMH, JCHS and LACOE, is planning a townhall tentatively set for Thursday, July 16 to discuss the impact of COVID-19 on juvenile institutions. Questions for the townhall can be submitted in advance to prob-news@probation.lacounty.gov.

For information or services, clients and members of the community may call the juvenile facilities. For general questions, please contact the Probation Information Center at 866-931-2222 Monday-Friday from 8 a.m. to 5 p.m.

Future Updates

The care of youth in Probation facilities is a joint effort between the L.A. County Probation Department, Juvenile Court Health Services, Department of Mental Health and the Los Angeles County Office of Education. During the COVID-19 crisis, these agencies have collaborated to create an environment of safety and stability for the youth under their care.

We are pleased that the situation in our juvenile facilities has remained largely stable during the COVID crisis and this creates an opportunity to respond to your needs for additional information about the situation. Accordingly, we invite questions related to the County's response to COVID-19 in its juvenile probation facilities or topics you would like to see addressed in future updates. Please email any questions to prob-news@probation.lacounty.gov and we will select questions and provide responses in future weekly updates. Please note that we cannot discuss the circumstances of any individual youth assigned to probation facilities.
